## **Mohave Wireless' New Tower Improves Cellular Coverage**

**July 6, 2007**, Kingman, AZ – Residents of Kingman will gain improved cellular coverage thanks to Mohave Wireless' new tower construction. Cellular coverage is improved due to a new tower at the interchange of I-40 east and HWY 93 going south to Phoenix, from the DW Ranch Road exit extending out I-40 east past the split and south on HWY 93 through Wikiup toward Wickenburg. Calling benefits of the new sites are increased signal strength, call quality and better in-building coverage.

**“Mohave Wireless is proud that we are able to continually improve service to our customers. It is our goal to provide our customers superior local and national coverage at affordable rates with the latest technology available,”** said James Moak, Mohave Wireless' General Manager.

Mohave Wireless is a CDMA-technology carrier which offers enhanced phone service including improved voice and call quality, longer battery life for phones, and a larger selection of phones with capabilities including camera options and text messaging.
